Summary

Scofield is a security expert familiar with Linux, Python, cloud computing, and blockchain.

He is good at writing research documents that can help businesses succeed.

Scofield is careful and hardworking and likes to keep things simple when solving problems.

He likes to read and work on open-source projects in his spare time. Scofield is also a technical writer for several websites, including LogRocket, Geekflare, Hackmamba, and RunX.

You can see some of his projects by visiting his page at <https://scofield-idehen.github.io/home/>.

Experience

Technical Author

LogRocket

Jan 2022 - Present (1 year 1 month)

Support UI - Build an internal support UI template documentation for web3

Ethereum Boilerplate - A react repo with a collection of many web3 use cases

Web3UIKit -

Web3 templates - an internal project

Technical Writer

Hackmamba

Dec 2021 - Present (1 year 2 months)

- Performing extensive research and analysis on content
- Creating specifications and content based on documentation profile

- Conducting periodic content audits
- Strategizing and improving content delivery and promotion
- Analyzing content marketing strategy to evaluate whether it's working or not.

Lead Technical Writer

RunX

Feb 2022 - Present (1 year)

Create Cloud Computing and Web3 Content For publications.

Deputy Chief Technology Officer

LinkOrion Technology Ltd

Feb 2016 - Present (7 years)

- Design and build LinkOrion web projects. Including management of digital touchpoints, homepage, and landing pages
- Increase brand awareness, promote the company's products, and drive prospects to conversion
- Evaluate emerging technologies, and keep the company at the forefront of digital media.
- Brainstorm new and creative growth strategies
- Utilize the solid analytical ability to evaluate end-to-end customer experience across multiple channels

Education

University of Benin

Bachelor of Arts (BA), International realation and diplomacy

2010 - 2015

Alchemy University

Blockchain Developer, Information Technology

2022 - 2023

I recently earned a blockchain developer degree, which taught me how to design and maintain decentralized systems using blockchain technology.

Through my studies, I learned about topics such as cryptography, smart contracts, distributed ledger technology, and various programming languages and frameworks used in the development of blockchain applications.

With my blockchain developer degree, I have gained the knowledge and skills necessary to create and deploy secure, efficient, and scalable blockchain-based solutions for a variety of industries.

I am also able to analyze and troubleshoot technical issues and understand the legal and ethical implications of working with blockchain technology.

Overall, my blockchain developer degree has prepared me for a successful career in this rapidly-growing field, allowing me to positively impact the world through the development of innovative and disruptive technologies.

Licenses & Certifications

Advance Python Developer Course - LearnHub.Africa

Enterprise Design Thinking Practitioner - IBM

Idehen Scofield

Cybersecurity Intro - IBM

Idehen Scofield

Identify and Investigate Cybersecurity Threats - IBM

 **ICSI | CNSS Certified Network Security Specialist** - ICSI (International CyberSecurity Institute), UK
18594475
